survey conducted exclusively for

The Level of Understanding and Interest in Digital Asset Services Among Financial Advisors and Their Clients August 2024

Total Respondents: 225 | Qualified Respondents: 71

High-Level Findings:

- Moderate Knowledge of Blockchain, Limited DeFi Understanding: Most financial advisors rated their blockchain knowledge as moderate to high, but many expressed low understanding of DeFi, highlighting a need for education in this area.
- Low Client Interest in Crypto Investments: While some clients are asking about digital assets, most advisors reported that only a small portion of their clients are expressing interest in crypto investments.
- Cautious Approach to Crypto Recommendations: Nearly half of advisors are not recommending crypto to their clients due to advisors' concerns about regulatory issues, cybersecurity risks, and market volatility.
- Minimal Engagement with Advanced Crypto Strategies: The respondents say most clients are not engaging in sophisticated crypto investment strategies, preferring simpler options such as spot ETFs or direct ownership of digital assets.
- **Barriers to Adoption:** Regulatory concerns, lack of knowledge, and client disinterest are key factors preventing most advisors from recommending crypto investments.
